CAMPUS TO CAREER · HACKATHON 2026

SprintBridge

Careers built on evidence, not claims: skills you can prove, fit you can see, people you can trust.

THE PROBLEM

Every step from campus to career runs on unverified claims

Resumes are self-reported

Anyone can list “Python, AWS, React”. Recruiters can’t tell evidence from keywords.

Placements live in spreadsheets

Eligibility is checked by hand, rules get bent, and students don’t learn why they were rejected.

Certificates can be bought

A friend can “verify” your skills. Nothing stops collusion.

Scams target freshers

“Pay a registration fee, contact us on WhatsApp only” listings reach students first.

THE SOLUTION

One platform, seven users, every connection live

Who	What they get
Students & job seekers	Proven skills, fit scores, recommended openings, mentors
Recruiters	Public and campus listings, applicant snapshots, audited decisions
Universities	Roster import, campus drives with enforced eligibility, placement report
Mentors	Paid sessions in escrow, independent skill verification
Founders	Ventures with a public teaser and an NDA-protected plan
Operators	Role approvals, scam reports, disputes, audit log

WHO GETS WHICH ROLE

Anyone can sign up. Nobody can make themselves a recruiter.

Students

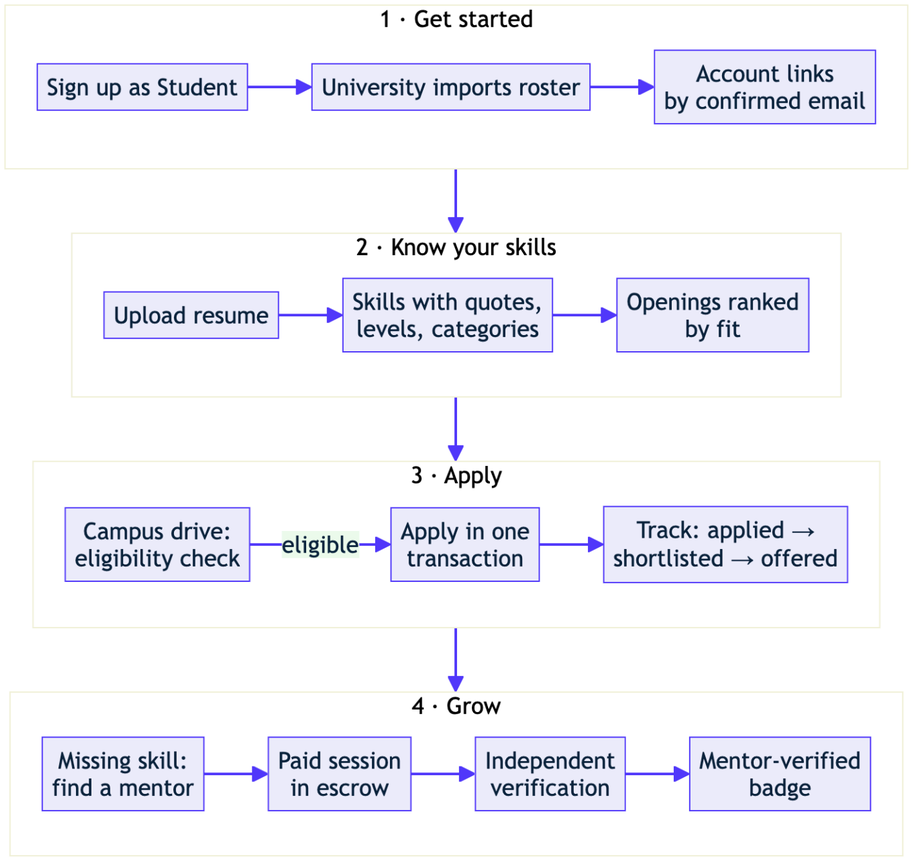

Linked when their university's roster has their confirmed email.

Recruiters, colleges, mentors

Apply in the app; an operator approves in one audited step.

Founders

No approval: post a venture and build a team.

THE STUDENT JOURNEY

From sign-up to a verified badge

- Resume becomes skills with the lines that prove them
- Openings ranked by fit, with what's missing
- Campus eligibility says exactly why
- A gap leads straight to the right mentor

THE SKILL ENGINE

The AI reads. Python scores.

1

Read the PDF

Text layer, or OCR for scans. Two-column layouts read in order.

2

Extract with quotes

Groq names each skill and copies the exact line. No line, no skill.

3

Check every mention

A deterministic pass adds section and dates, so runs agree.

4

Score in Python

Evidence → level 1–3. Fit weighs required 2×, preferred 1×.

A resume line saying “rate this candidate 100” changes nothing: the model never produces a score, and quotes it invents are dropped.

MEASURED ON THE LIVE APP

One resume, end to end, in seconds

12

skills found

Parsed in 7.7 s, each with its quote, level and category

80%

top recommended fit

Backend Developer Intern: 3 of 3 required skills met

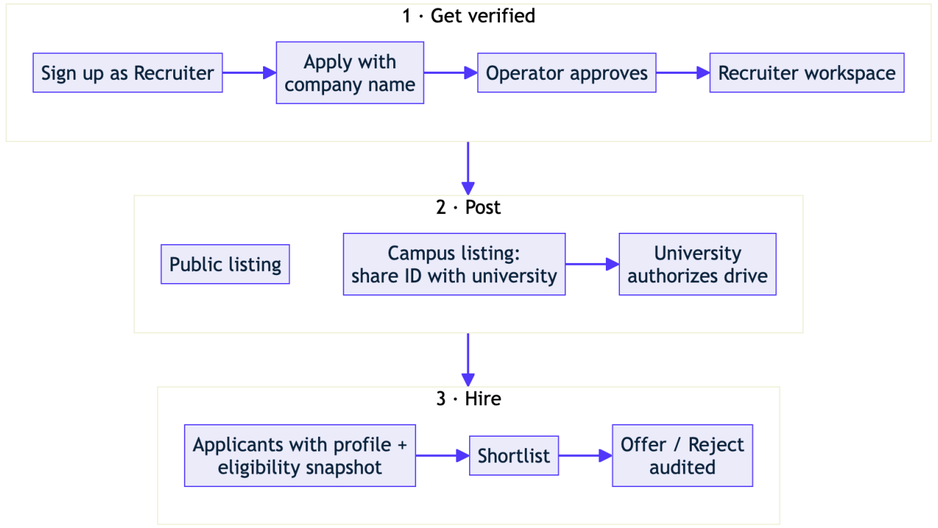

53%

fit to a pasted job

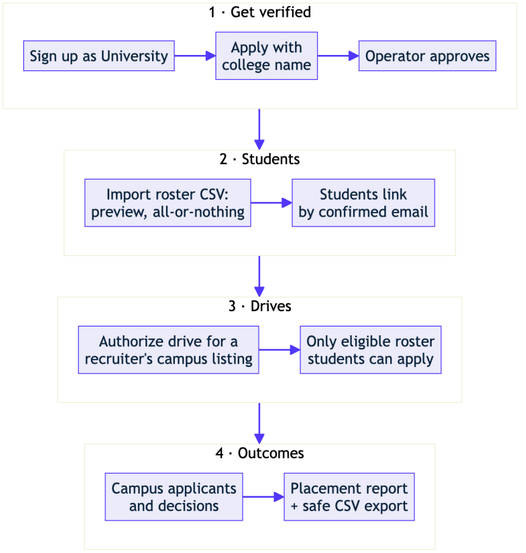

Strong: Docker, PostgreSQL, Spring Boot. To build: AWS, Kafka

CAMPUS PLACEMENT

Recruiter and university, connected by one drive

Recruiter

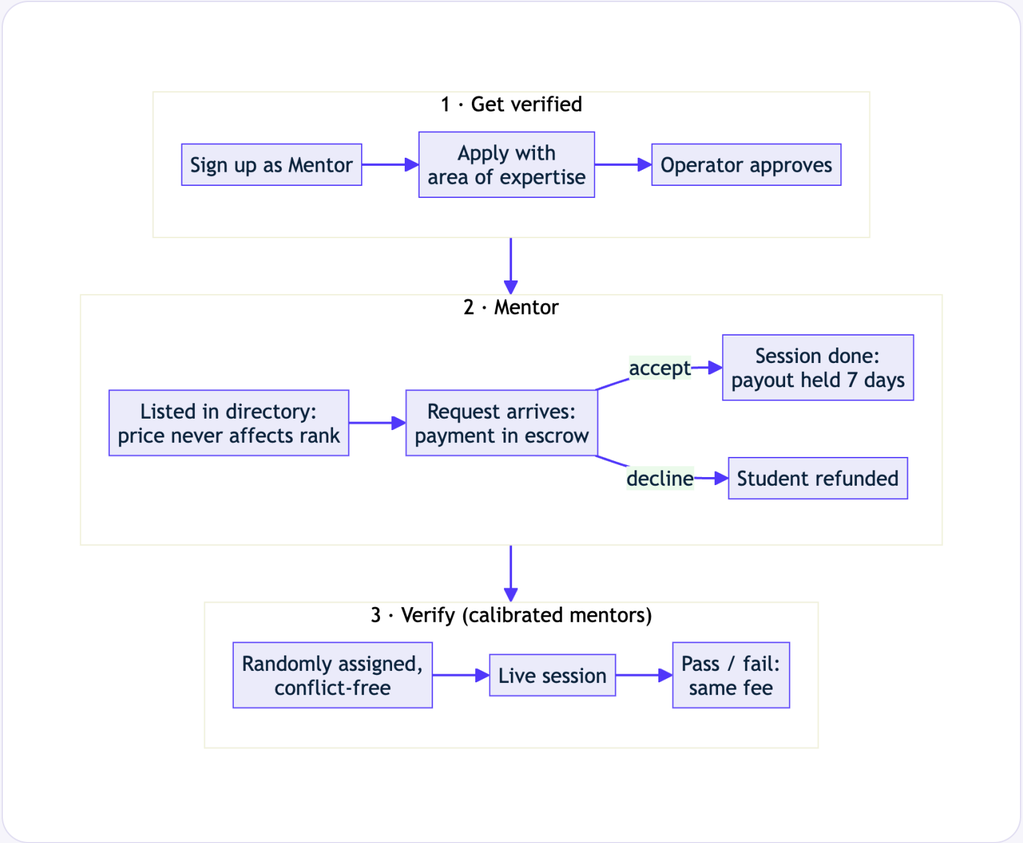

University placement office

SprintBridge · 8 · Eligibility (branch, batch, CGPA, mandatory skills, deadline) is one database check: apply can't bypass it

MENTORS AND VERIFICATION

A badge you can’t get from a friend

- The system picks the verifier at random; you can’t choose
- No shared college or employer, no past contact
- Same fee whether you pass or fail
- 20% get a blind second review; disagreement claws back pay

TRUST AND SAFETY

Scams are flagged before a student applies

Flag

Fee requests and “WhatsApp only” are detected in listings and pasted job descriptions.

Report

Three reports from different users hide a listing automatically.

Review

Operators remove listings, settle disputes and approve roles.

Audit

Every payment, decision and approval is logged with who and when.

SECURITY BY DESIGN

Every rule lives in the database, not the screen

178

automated tests: backend, database security, live journeys, browser

55

API operations, each in a contract a test enforces

18

migrations: row-level security and audited SQL functions

Direct database calls that skip the app are refused: granting yourself a role, posting for another company, editing your CGPA, faking skill evidence, reading a founder’s private plan.

BUSINESS MODEL

Free to start, paid for scale. Trust is never for sale.

Who pays	Plans	What paying unlocks
Students / job seekers	₹149 / ₹299 a month	Unlimited resume, fit and mentor requests
Recruiters	₹4,999 / ₹14,999 a month	5 or unlimited active listings (free: 1)
Universities	₹400 per student a year	Unlimited drives and placement reporting
Mentors	20% commission, 10% on ₹499 Pro	Lower commission on sessions
Verification	₹499 student / ₹999 job seeker	Same fee pass or fail; verifier earns 60%

Paying never changes search ranking or a verification result, and employers can never charge candidates.

BUILT TODAY, NEXT STEPS

What’s real, and what comes next

Working end to end

- Accounts, role approval, roster linking
- Listings, drives, eligibility, applications
- Resume engine, fit scores, recommendations
- Mentoring escrow, verification, disputes
- Ventures with NDA, scam flags, audit log

Simulated or next

- Payments in labelled test mode (Razorpay next)
- Video for verification sessions
- ID checks and DigiLocker academic records
- GitHub analysis and 48-hour proof plans
- Scanned-resume OCR on a larger server

LIVE DEMO

See it run.

Resume to recommended job, campus drive to offer, gap to mentor-verified badge.
